To Whom It May Concern:

The day I purchased my Australian Sheppard puppy

I was floating on air with joy. I showered this dog

with love, attention and treats. In about 72 hours

He had my number and was Alpha Dog in our

little pack. My joy quickly turned to despair. I called

Victor, whom I had known for years, and under his

guidance and training my dog is once again a joy. In

fact total strangers stop me and want to buy him.
