

Bella is my three year old Terrier mix. Before working with Victor, Bella had NO manners. She jumped on people, ran out the front door any time it was opened, tugged and pulled on her leash, and generally ran the house. On top of all of this, Bella peed and pooped in the house, even if she had just been outside! My husband and I figured that we were pretty much stuck with this very stubborn little monster we had created until we met Victor with K9 -101! From our very first meeting with Victor when he came to our house, Bella's behavior began to improve immediately. It was more of a matter of we humans changing OUR behavior, and Victor was fantastic at getting that started. After just 5 lessons with Victor, Bella heals, stays, walks calmly on a leash next to me, sits, lays down, and so much more. She no longer darts out the front door, she does not jump on house guests or onto furniture, and, wait for it.. she is finally house trained! If Victor can turn our little Terrier Terror into a well-trained doggy who LOVES to please her human with her good behavior, he can work with any dog!
